

1) Define System Vision

NexusOS is a multi-tenant SaaS administration platform that enables organizations to manage users, products, and orders securely through a centralized dashboard.

2) Define Core Modules

- Authentication
- Authorization
- Dashboard
- Tenant Management
- Users Management
- Products Management
- Orders Management

3) User Roles

- Super Admin
- Tenant Admin
- User

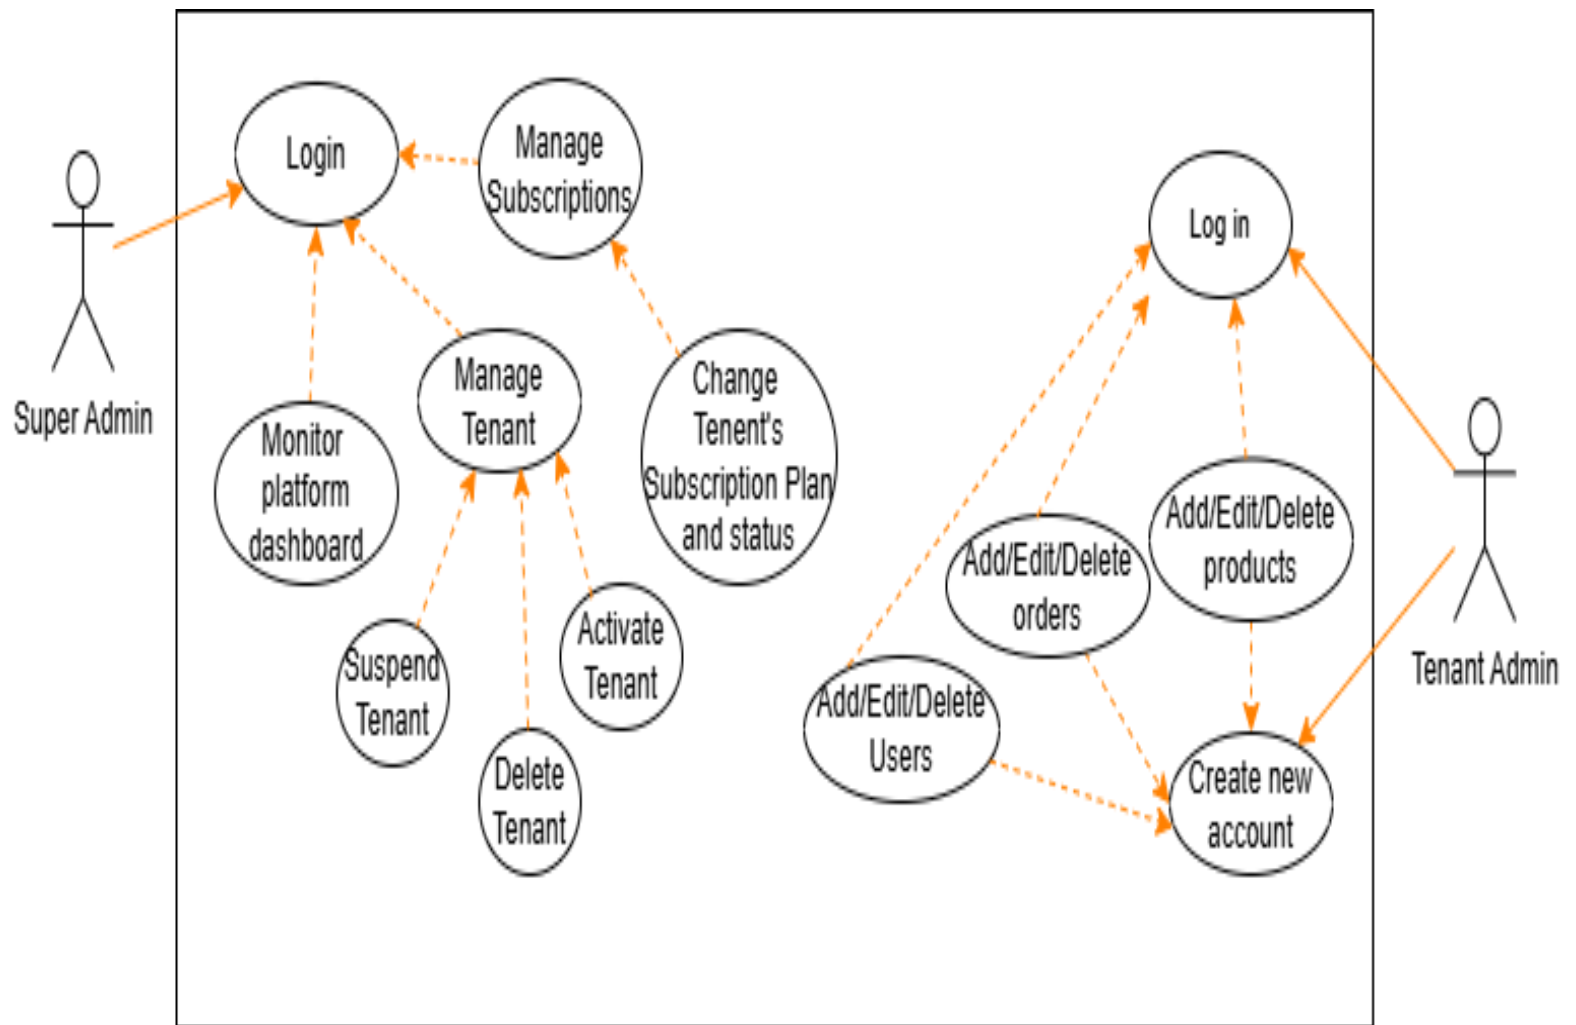

4) Plans

- Enterprise
- Pro
- Basic

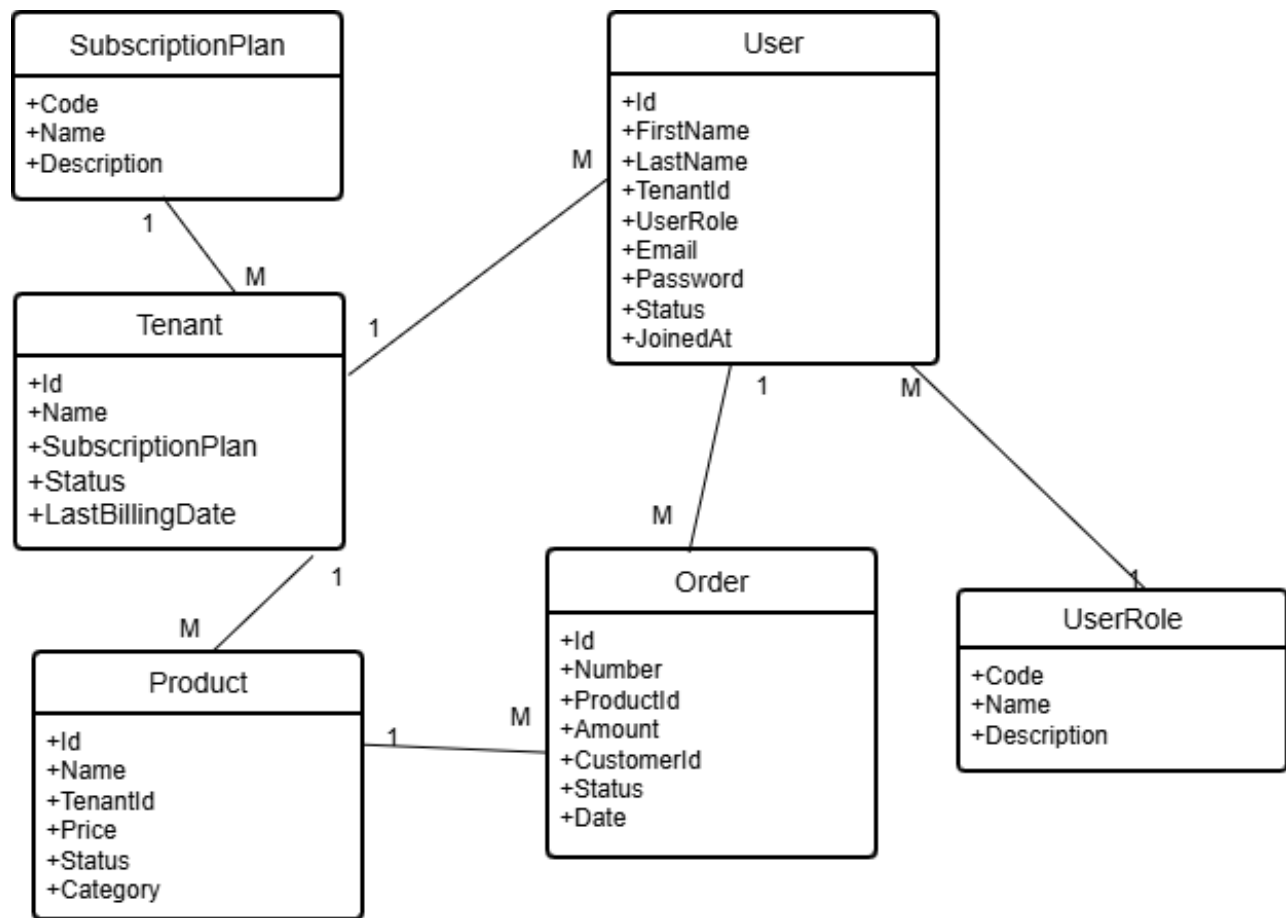

4) User Stories

- I. As a Super Admin, I want to oversee entire system infrastructure and manage tenants.
- II. As a Tenant Admin, I want to create users so that my organization can manage access.
- III. As a Tenant User, I want to create and manage products and orders depend on given permission.

5) Use Cases
